Instance with scaling wax, but there is no impression of meed. The attention of boxholders is called to the necessity of carefully sealing such boxes with some recognisable seal, and of sending a chit-DEBT contracted by the Officers or the Crews book or receipt with them. The emission of the latter precaution leaves a doubt as to whethe the contents of the box ever reached the Post Office: the emission of the former, as to whether part of them might not have been abstructed for the sake of the Postage Stamps.

Persons who send Musters of Ten through the Post in Tins are requested to have them made flat or sonare justeed of round, as it is impossible to pack round time securely in the mail bags. It is believed that the tea will travel more safely in flat ting, which are not so liable as round ones to be bulged in. 4 by 3, by 13 inches is suggested as a good size.
